# Contents of Vol. 163

Part 1

Editorial 1

M. MICHEL, T. HILLMANN and M. MÜLLER. Cryosectioning of plant material frozen at high pressure 3

KARSTEN RICHTER, HELMUT GNÄGI and JACQUES DUBOCHET. A model for cryosectioning based on the morphology of vitrified ultrathin sections 19

MICHAEL SJÖSTRÖM, JOHN M. SQUIRE, PRADEEP LUTHER, ED MORRIS and ANNE-CHRISTINE EDMAN. Cryoultramicrotomy of muscle: improved preservation and resolution of muscle ultrastructure using negatively stained ultrathin cryosections 29

TAKASHI NAKADERA, AKIRA MITSUSHIMA and KEIICHI TANAKA. Application of high-resolution scanning electron microscopy to biological macromolecules 43

ROGER WEPF, MATTHIAS AMREIN, URS BÜRKLI and HEINZ GROSS. Plantinum/iridium/carbon: a high-resolution shadowing material for TEM, STM and SEM of biological macromolecular structures 51

J. S. RYERSE and B. A. NAGEL. Gap-junction quantification in biological tissues: freeze-fracture replicas versus thin sections 65

WINFRIED WIEGRÄBE, MARTIN NONNENMACHER, REINHARD GUCKENBERGER and OLAF WOLTER. Atomic force microscopy of a hydrated bacterial surface protein 79

SHAHRAM VAEZY and JOHN I. CLARK. A quantitative analysis of transparency in the human sclera and cornea using Fourier methods 85

K. M. W. KEOUGH, P. HYAM, D. A. PINK and B. QUINN. Cell surfaces and fractal dimensions 95

LUIS M. CRUZ-ORIVE and C. VYVYAN HOWARD. Estimating the length of a bounded curve in three dimensions using total vertical projections 101

**Rapid Publication**

MARKUS TOBLER and ANDREAS U. FREIBURGHAUS. Exceptional protective power of the 4H glove defeats occupational risks in electron microscopy RP1

Part 2

Editorial 115

**Invited Review**

N. F. VAN HULST, N. P. DE BOER and B. BÖLGER. An evanescent-field optical microscope 117

T. WILSON and S. J. HEWLETT. Optical sectioning strength of the direct-view microscope employing finite-sized pin-hole arrays 131

PETER J. SHAW and DAVID J. RAWLINS. The point-spread function of a confocal microscope: its measurement and use in deconvolution of 3-D data 151

K. CARLSSON. The influence of specimen refractive index, detector signal integration, and non-uniform scan speed on the imaging properties in confocal microscopy 167

S. HELL, S. WITTING, M. v. SCHICKFUS, R. W. WIJNAENDTS VAN RESANDT, S. HUNKLINGER, E. SMOLKA and M. NEIGER. A confocal beam scanning white-light microscope 179

T. D. VISSER, F. C. A. GROEN and G. J. BRAKENHOFF. Absorption and scattering correction in fluorescence confocal microscopy 189

MARKUS MONTAG, JÖRG KUKULIES, REINHARD JÖRGENS, HEINZ GUNDLACH, MICHAEL F. TRENDELENBURG and HERBERT SPRING. Working with the confocal scanning UV-laser microscope: specific DNA localization at high sensitivity and multiple-parameter fluorescence 201

P. BHANU PRASAD and J. P. JERNOT. Topological description of the densification of a granular medium 211

A. BEORCHIA, D. PLOTON, M. MENAGER, S. LEBONVALLET, M. THIRY and N. BONNET. Digital three-dimensional visualization of cellular organelles studied by medium- and high-voltage electron microscopy 221

FIZA RASHID and RICHARD W. HOROBIN. Accumulation of fluorescent non-cationic probes in mitochondria of cultured cells: observations, a proposed mechanism, and some implications 233

Book Review 243

Part 3

TREVOR F. PAGE, CARL J. MCHARGUE and C. W. WHITE. SEM electron channelling patterns as a technique for the characterization of ion-implantation damage 245

Z. L. WANG. Reflection electron imaging and spectroscopy studies of aluminium metal reduction at α-aluminium oxide $(0,\bar{1},2)$ surfaces 261

TUNG HSU, T. Y. WANG and G. B. STRINGFELLOW. Electron microscopic study of the atomic structure of OMVPE-grown GaInAs/InP quantum wells 275

PIERRE-JACQUES FLAMION, CLAIRE CACHIA, JEAN-PIERRE SCHREIBER, THIERRY DAVID, ERIC LESNIEWSKA and JEAN-PIERRE GOUDONNET. Images of 16S ribosomal RNA by scanning tunnelling microscopy 287

R. GAUVIN and G. L'ESPÉRANCE. Determination of the $C_{nl}$ parameter in the Bethe formula for the ionization cross-section by the use of Cliff–Lorimer $K_{AB}$ factors obtained at different accelerating voltages in a TEM 295

STUART M. BAILEY and JOSEPH A. N. ZASADZINSKI. Validation of convection-limited cooling of samples for freeze-fracture electron microscopy 307

D. J. MYCOCK and PATRICIA BERJAK. In defence of aldehyde–osmium fixation and critical-point drying for characterization of seed-storage fungi by scanning electron microscopy 321

STEPHEN A. LANGFORD. A modified Jelley refractometer 333

Book Reviews 347
